

hm61

design: Nigel Coates

Designed for his award-winning Oyster House, Nigel Coates' 'Oxo' seating system is based on two complementary forms which can be used together to create dynamic and flexible arrangements or as individual seats. A small side table with laminate top completes the range.

Upholstery is available in a wide range of fabrics and leathers. Backs and seats can be covered in contrasting fabrics. Frames are of beech and preformed ply with elastic webbed seats, upholstered in graded CMHR foams with a dacron wrap.

Seat height 410mm
