

hm102 mosaic

Mariani's **hm102** system is based on the concept of three basic components - a backrest, seat and single armrest - and combining these parts builds a family of ten different modules. Some are asymmetric and can assume different rotations, offering countless solutions and combinations, made up of armchairs, easy chairs, sofas, daybeds, benches and tables.

The range consists of perfectly proportioned, beautifully upholstered building blocks, acting as a simple grid to generate all kinds of seating typologies and functional compositions, thereby responding to various needs of the everyday user - making it adaptable and playful. The upholstered platforms appear to float on the light base frame; while the generous proportions of the armrest and backrest offer comfort and provide alternative working surfaces.

Colours and fabrics can be varied between blocks, with table tops in white laminate, walnut or oak veneer with solid edging, and standard base colours in black or white. Bespoke base colours and finishes can be specified, and power, data and charging units can be integrated.

Following his graduation from architecture school at the University of Genoa, Massimo Mariani joined the Renzo Piano Building Workshop to work on the redevelopment of the Lingotto factory in Turin. Later he worked with Herman Hertzberger's Architectuurstudio in Amsterdam on a number of projects in Italy, Germany and Japan.

Moving to London in 1998 to work on architectural and urban renewal schemes, he started his own practice in 2004 focussing on architecture and industrial design research. He has a number of furniture designs in production with high-profile Italian manufacturers and his pieces have been exhibited worldwide. In 2011 he was awarded an Honorable Mention at the XXII ADI Compasso d'Oro. Mariani's **hm102** is his second product for Hitch Mylius, following the **hm101** public seating system in 2012.

power, data and charging units can be integrated

hm**102**b, d and e with hm**108**z1 laptop table

hm**102**d1 with angled backs
