### Environmental Policy

At Hitch Mylius, we are very aware of the environmental consequences and impact of our work and our products.

Our unique combination of manufacturing standards and design expertise means that our products are extremely durable and offer built in longevity. Many of our pieces may be re-upholstered to extend the product life. We strive to mitigate and minimise their impact through careful material selection, reduction in waste and improved energy efficiency. We ensure that environmental considerations are part of our everyday working practice, and we are committed to complying with all relevant environmental legislation.

Our impact on the environment is reduced by us focussing on the following areas;

#### Reducing and recycling waste

It is our policy when dealing with waste to follow the waste hierarchy; **prevent, reduce, reuse, recycle, recover**. Therefore we try to **prevent** and **reduce** waste where possible by ensuring materials are measured accurately. Where waste does occur we try to **reuse** it within our existing processes, if this is not possible we either look for reuse options outside of the company or we source a service provider who will **recycle** the material. For example, our foam off cuts are taken back by our foam supplier and **recycled** in the production of chip foam. We **reuse** the cardboard rolls that fabric is supplied on as packaging for our sofa legs. Leather and fabric scraps that cannot be reused are collected by organisations that allow them to be **recycled**. Our waste is then split with cardboard, paper, polythene product wrapping and plastics being **recycled**.

#### Improving our energy use

We periodically monitor our energy and water consumption with a view to reducing our consumption of both. It is company policy to switch off lights and equipment when not being used. We regularly service our equipment and machinery to ensure it is working efficiently. We also consider the energy and waste implications when purchasing new equipment and fixtures.

#### The sustainability of our raw materials

We are motivated to produce the most environmentally friendly products reasonably possible, as such we regularly assess whether the materials going into our products are the most sustainable available to us. The wood in our upholstery frames is from renewable European sources, and our wooden table tops are from an FSC certified supplier. Many of the steel parts use recycled materials.

We use recycled polythene for wrapping the finished furniture.

## Sourcing & transport

Where possible, and in the majority of cases, components are sourced from within the UK to minimise the carbon emissions associated with transportation. Many of our key suppliers are local to us – our sofa frames and metalwork suppliers are 12 miles from our factory.

All of our employees are responsible for ensuring high standards of environmental care, and we provide information and support to assist this process. We also talk to our suppliers to discuss their environmental performance and encourage improvements wherever possible.

Business activity will be regularly monitored to ensure that it adheres to this policy.

In pursuit of our intention to continually improve our performance we set environmental targets and objectives and these are regularly reviewed for ongoing suitability.

This policy will be reviewed periodically as we strive to make continual improvement to our environmental efficiency.

We are certified to **BS EN ISO 14001:2015** and have been since October 2010.

## Certificate of Registration

This is to certify that the Environmental Management System of

### **Hitch Mylius**

301 Alma Road, Enfield, Middlesex, EN3 7BB

has been assessed by The Certification Group for conformance to the requirements of:

### **BS EN ISO 14001:2015**

#### Scope of Registration

**Production & Design of upholstered furniture at site: 301 Alma Road, Enfield, Middlesex, EN3 7BB**

*Signed on Behalf of The Certification Group*

*Certification Manager: Elaine Hanaghan* .....

Registration No	2100621
Initial Certification Date	21/10/2010
Certificate Issue Date	31/01/2019
Certificate Expiry Date	20/10/2019
Issue No	8

The Certification Group Limited

Although certification is granted for 3 years, this is subject to annual surveillance audits to ensure compliance with the above standard

This Certificate was issued electronically by The Certification Group Limited and Remains the Property of The Certification Group Limited and is bound by Conditions of Contract.

The Certification Group Limited, Archer House, Northbourne Road Eastbourne East Sussex BN22 8PW Reg: 10104589 United Kingdom Part 1 of Companies Act.
